Subject: San Juan Water District
2009 Supplemental Statement of Water Diversion and Use

To Whom It May Concern:

Enclosed is San Juan Water District's 2009 Supplemental Statement of Water Diversion and Use for the years 2006, 2007, and 2008. The following information is intended to clarify the enclosed statement:

1. Our correct telephone number is (916) 791-0115.
2. Our diversion takes place at the United States Bureau of Reclamation Folsom Pumping Plant located at Folsom Dam in Sacramento County. Diverted water is used for domestic and municipal purposes in Placer and Sacramento Counties.
3. This report of water diversion and use covers the monthly quantity diverted under our pre-1914 water rights, license no. 6324. SJWD is the holder of the following appropriative water rights: (1) a pre-1914 appropriative water right to divert 60 cubic feet per second from the American River with a priority date of 1853; and (2) an appropriative water right under permit no. 4009 (application 5830, filed on February 11, 1928) to divert 15 cfs from the American River, which was issued on October 26, 1932 by the State of California, and which is delivered from Folsom Reservoir by Reclamation under an agreement between SJWD and Reclamation. Under the 1954 settlement agreement between SJWD and Reclamation, the total amount of water that may be diverted by the District under its pre-1914 water right and permit No. 4009 cannot exceed 33,000 acre feet per year at the rate of 75 cfs.

State Water Resources Control Board
Division of Water Rights
June 24, 2009
Page 2

4. This Supplemental Statement of Water Diversion and Use only covers our water rights water as described above. It does not cover our diversions at Folsom Dam related to our CVP contract water or water obtained through our contract with Placer County Water Agency.

If you have any questions about this information, please call me at (916) 791-6906.

Sincerely,

A handwritten signature in cursive script, appearing to read "Keith B. Durkin".

Keith B. Durkin
Assistant General Manager

CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water San Juan Suburban Water District
Address 9031 Central Ave., Orangevale, California

B. Name of body of water at point of diversion Folsom Lake
Tributary to American River

C. Place of diversion 1/4 NE 1/4 Section 23, Township 10N, Range 7E, MD B&M, Sacramento
County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Hinkle Reservoir

E. Capacity of diversion works 120 cubic feet per second
Capacity of storage reservoir 18.25 Million gallons
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966	1002.5	791.8	1208.7	2683.5	4099.1	4671.4	5111.3	4999.2	3949.6	3289.2	1275.8	960.2	34040.3

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years 34460.8 (1959) million acre-feet
Minimum annual water use in recent years 19223.0 (1955) million acre-feet
Type of diversion facility: gravity ☒ , pump ☐ Bureau of Reclamation pumps at low lake level
Method of measurement: weir ☐ , flume ☒ , electric power meter ☐ , water meter ☐ , estimate ☐

F. Purpose of use (what water is being used for) Domestic & Irrigation

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Northeast Sacramento County - South Central Placer County - 28100 acres

H. Year of first use as nearly as known 1852

I. Name of person filing statement Willis D. Clover
Position Manager Organization San Juan Suburban Water District
Address P.O. Box 85 Orangevale, California

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed May 11, 1967

Signature Willis D. Clover
